

## AV Smart Solutions Brings Tech to the Great Outdoors in Suncadia

A family in Suncadia, Washington, wanted a way to enjoy entertainment outdoors and indoors without a hitch. They'd heard about our stellar customer service and expert installations.

In May of 2019, [AV Smart Solutions](#) answered their call! And it was a match made in media heaven.

### Project Scope and Brands

This residential project needed expertise in outdoor and indoor media systems alike. Ultimately, we equipped an array of rooms alongside three patios.

After consulting carefully with the homeowners, we all decided Sonos, SunBrite and Apple TV were the best brands for the job.

## Indoor Media Systems

We're serious about working closely with clients! That's why we asked this Suncadia family exactly what they wanted from their AV setup. With their detailed input, we designed and commissioned their ideal media systems for intuitive use throughout the home.

We supplied all the necessary sound system equipment. Meanwhile, the homeowners provided [smart TVs](#) and Xbox consoles for us to install and configure.

We started with the [living room](#), main [bedroom](#), guest bedroom and bonus room. In those spaces, we configured the homeowners' Atlas IPTV for streaming and sharing. We provided an Apple TV for additional streaming options — more options are always better!

Next, we outfitted the spaces with high-performance Sonos music systems, which let the homeowners easily stream music from popular music services. After a touch of our tech wizardry, all rooms can operate independently and/or in group mode, with the ability to link multiple rooms.

## Outdoor Media Systems

Having smooth outdoor AV access is important to the family. With that top of mind, we made sure they can bring their movies and tunes outside anytime.

We designed and installed Sonos music systems at the beautiful hot tub and fire pit patios. Next, we supplied and installed a SunBrite TV and Sonos sound system at the spacious main patio.

The homeowners can now stream media from the Sonos system and Apple TV while relaxing solo or hosting guests in wide-open spaces!

## What the Homeowners Had To Say

“Aaron and his team helped us enhance our music and TV experience at our cabin in Suncadia — and we love what they did! They are experts and solved every one of our asks!

“Kids have their zones for music, we can enjoy our outdoor living spaces much more, streaming services are all integrated and it's really easy to use. A fantastic experience all the way around

from understanding what our goals were up front to the finishing touches of installation and programming.”

— Jeff Laub, Suncadia Homeowner
